In the uncharted wastes of Antarctica, an exploration party from Miskatonic University encounters a gory sight when they discover their advance team's camp has been destroyed and its members slaughtered. There is no evidence of what happened except a series of burial mounds, six of which contain dead specimens of unknown species. Eight similar tombs are empty, but they haven't been broken into—they've been broken out of.

What began as a search for knowledge soon becomes a terrifying confrontation with the true nature of the world and the universe in all its stark blackness and unyielding oblivion. For mankind is not—and never has been—the bright light of creation. It's all a mistake, an insignificant stain of existence, forgotten by an unwitting and indifferent creator . . . until now.
