A brick and a blanket are two of the most mundane objects imaginable, and that's why trying to come up with creative uses for these two boring objects tests the imaginative powers of anybody willing to conceive possible applications.

Where an IQ test is very rigid and doesn't test one's creativity, this is an intelligence test that is better able to gauge the creative output of the mind of the test taker.

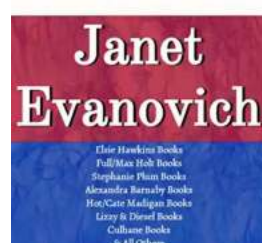

Before buying my book, I suggest you write down your own list of uses for a brick and a blanket, and then see if any of your items made it into my book.

I doubt any of your items made it into my list, just like I doubt any of my items appear on your list. I doubt any two lists in the world would be exactly the same, and that's part of the charm of this test. It truly does allow insight into the personality of the test taker.

The results of each Brick and Blanket test are so unique to each person that I'd be willing to bet (with your money, of course) that if you lined up two monozygotic twins, two clones of John Cleese, and Newton and Leibniz, no pair of answers would be identical.

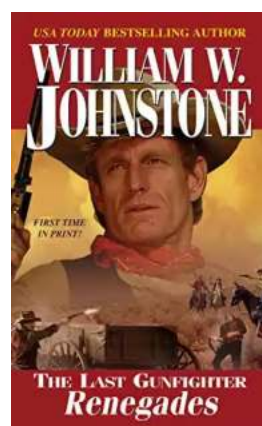

Please feel free to leave your own answers in the review section of my book.
